DETAILED ACTION

Claims 1-11, 13, 14, 17, 18 and 21 are under consideration in this application.

Claims 12, 15 and 20 remain held withdrawn from consideration as being drawn to nonelected subject matter 37 CFR 1.142(b).

Election/Restrictions

The lack of unity requirement is deemed sound and proper and is hereby made FINAL.

This application has been examined to the extent readable on the elected compounds wherein R¹ represents (optionally substituted) pyridyl, R² represents substituted phenyl, R⁵ – R⁹ represent non-heterocyclic groups and X, R³, R⁴ as set forth in claim 1, exclusively. Claim 18 has been examined to the extent readable on the elected method of use, *i.e.* treatment of benign prostrate hyperplasia. It is suggested that the nonelected subject matter be deleted.

Claim Rejections - 35 USC § 112

The rejections under 35 U.S.C. 112 are hereby withdrawn in view of applicants' amendments to the claims.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164

Art Unit: 1625

USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-11, 13, 14, 17, 18 and 21 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9, 11, 13-18, 23, 31 and 32 of copending Application No. 11/587,192. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant compounds are generically embraced therein having the same use.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The typographical error is regretted and the serial no should be "11" and not 10.

A terminal disclaimer has not been received to date.

Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1625

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
